📍 As Sulay, Riyadh, Saudi Arabia 🏳 Pakistani 🪪 LG5972171

👤 ABOUT ME

Software Engineer with 6 years of experience in designing, developing, and deploying scalable web and mobile applications. Skilled in modern frameworks including Node.js, React.js, Next.js, NestJS, and Django, with hands-on expertise in Flutter for cross-platform mobile apps. Strong background in CI/CD pipelines, GitHub Actions, and cloud deployments. Experienced across freelancing and professional roles, delivering high-quality solutions with a focus on performance and reliability. Seeking to bring technical depth and problem-solving skills to a forward-thinking team in Saudi Arabia.

🧠 SKILLS

Javascript / Typescript
- React Js / Next Js
- Nest Js (Microservices)
- Express Js (REST and Graphql)
- Remix (Shopify apps)

Flutter
- Get X (State Management)
- Provider (Custom State Management)
- Workmanager (Bakground Management)

Python
- Django (Web Development)
- Django REST Framework (API Development)
- RESTful APIs for Web & Mobile Apps
- Web Scraping & Automation (BeautifulSoup, Requests, Selenium)
- CLI Tools & Scripting

AI / Machine Learning
- Basic Regression & Classification Models
- Neural Networks (Foundational Understanding)
- Data Preprocessing (Python, Pandas, NumPy)
- LLM APIs (Function Calling & Workflow Automation)
- Prompt Engineering & AI-assisted Applications

CI/CD
- GitHub Actions (Automated Workflows & Deployments)
- Docker (Containerization & Deployment)
- AWS / Firebase (Cloud Deployments & Hosting)
- Automated Testing & Linting Pipelines

💼 PROFESSIONAL EXPERIENCE

Sinior Software Developer, *Nyoko Inc*   07/2022 – Present
                                                                          Doha, Qatar
- Led backend development using **Django & Django REST Framework** for web and mobile applications.
- Built and deployed cross-platform mobile apps with **Flutter**, integrating APIs and third-party services.
- Managed a team of 4 developers, overseeing code quality, feature delivery, and task coordination.
- Handled **CI/CD pipelines, deployments, and production maintenance** to ensure reliability and scalability.
- Collaborated with stakeholders to translate requirements into technical solutions and shipped product updates on schedule.

MERN Stack Developer, *Turing* 🔗   09/2022 – 10/2023
                                                                          Remote
- Developed full-stack features for a client using **Next.js**, handling both frontend and backend responsibilities for web and mobile interfaces.
- Integrated **Solidity smart contracts** within the application workflow, enabling seamless blockchain interactions and secure logic execution.
- Collaborated with stakeholders to translate requirements into functional components, maintaining quality, responsiveness, and clarity in delivery.

Freelance Web Developer, *Fiverr*   01/2019 – 01/2022
                                                              Freelance
- Delivered custom web applications using **Laravel** and **CodeIgniter**, tailored to client needs.
- Built and customized **Shopify themes and plugins**, improving store functionality and design.
- Assisted clients with **digital marketing setups** to enhance online presence and sales.

🎓 EDUCATION

Bachlors in Software Engineering, *University of Haripur* 🔗   07/2019 – 02/2024
                                                                              Haripur, KPK,
                                                                              Pakistan
Studied core software engineering subjects including programming, algorithms, databases, and software design, with practical training based on the HEC Pakistan curriculum.

📂 PROJECTS

BudgetFlow, *Mobile Application – AI-Powered Budget Tracker*   02/2025 – Present

- Developed a **budget management mobile app** with expense tracking, category insights, and smart budgeting features.
- Integrated **AI assistance using LLM APIs and function calling**, enabling users to query local data, get reports, and receive personalized financial advice.
- Implemented **savings suggestions, automated reports, and planning tools** to help users stay on top of their finances.

FormJem, *Web Application – Form Builder Platform* 🔗   04/2024 – 10/2024

- Built a **drag-and-drop form builder** that can be embedded into websites or shared via links, similar to Google Forms.
- Integrated with **marketing platforms** (Facebook, TikTok, Reddit, Snapchat, Google Ads, etc.) to send leads via **conversion APIs and pixels**.
- Designed for **scalability and ease of use**, helping businesses capture and track leads effectively.

♟ HOBIES

- Reading SciFi Books and Novels
- Playing Chess 🔗
